Subject: RE: Paynesville Environmental Fee

Dear Glenn / Henry / Rory,

Thank you for the report and we wish to extend our greatest appreciation for the professional service that Atma Environmental provided to us.

I have reviewed the report and conclude that it is quite thorough. At this stage I have no further questions, however I will forward the report to Simonds for their review and confirmation that they can proceed with the site works. If they have any further queries, I will ensure to forward them to you.

However pending that, I will ensure that Atma Environmental will be foremost in my mind for recommendations should we/or others that we know be in a need of environmental consulting in the future.

I have no doubt that Simonds will also refer future works to Atma, as they were also struggling to find good Environmental Consultancy companies to deal with in the Gippsland areas.

Thanks & warm regards,

Michael & Jem Rhodes

Hi Michael,

We are pleased to provide here our finalised report on Paynesville. Luckily the tank is much smaller than anticipated and without any measurable contamination.

Happy to take any question you may have upon reading.

Regards,
Glenn Berry, *CEnvP*
